# Soufiane Ibnaïche

## Front-End Developer React / TypeScript

Paris area, France · Full remote · Available for freelance contracts or a permanent role
soufianeibna@gmail.com · 06 95 38 72 40 · soufiane.madapes-agency.com · linkedin.com/in/soufiane-ibnaiche · github.com/SniOpy

### SUMMARY

Front-end developer specialised in React and TypeScript. Self-taught coder since 2016 (Codecademy, OpenClassrooms), shipping React projects to production since 2023, from requirements to release. I build fast, accessible and maintainable interfaces with a strong product mindset: I also run Google Ads campaigns and conversion tracking. AI tools (Claude Code, MCP, n8n) are now part of my core workflow: I see mastering them as decisive today as professional English was a generation ago — a skill you have to keep deepening, not just tick off. Available immediately for a freelance contract or a full-remote permanent position.

### TECHNICAL SKILLS

**Front-end:** React, TypeScript, JavaScript (ES6+), Vite, Tailwind CSS, styled-components, Redux Toolkit, React Router, HTML5, CSS3, responsive design, accessibility, animations (Web Animations API)
**Back-end:** Node.js, Express, REST APIs, PostgreSQL, Supabase, Firebase Firestore, Redis, JWT, bcrypt
**Tools and methods:** Git, GitHub, Vercel, Render, Shopify Hydrogen, Scrum, code review
**AI and automation:** Claude Code, AI agents, MCP, n8n
**Marketing and data:** Google Ads, GA4, Google Tag Manager, conversion tracking

### PROFESSIONAL EXPERIENCE

**Front-End Developer React / TypeScript (freelance)** 2023 – present
Madapes Agency · Full remote

- Design and development of React / TypeScript websites and web apps, from requirements gathering to production release.
- Colourpig (e-commerce, Australian brand): React / TypeScript prototype delivered in one week, then migrated to Shopify Hydrogen.
- Built the agency website: design tokens as CSS variables, interactive demos, bilingual FR / EN site.
- Managed Google Ads campaigns for several clients and set up conversion tracking (GA4, Google Tag Manager).
- Client result (service business): up to €120,000 in quote requests over 6 months on a €2,000 monthly budget.

### PROJECTS

**DabaGo** · TypeScript, Express, PostgreSQL, Leaflet, JWT 2026
Delivery app connecting individuals and merchants: courier space, step-by-step missions, route map, amount-to-collect breakdown. Secured API (JWT, input validation, rate limiting).

**Tadara** · React, styled-components, Express, Supabase 2026
Waitlist landing page in a monorepo: Express API storing sign-ups in Supabase and sending a confirmation email.

**EcoTrend** · React, Vite, Express, PostgreSQL, JWT 2025
Full-stack e-commerce: filterable catalogue, dynamic cart, JWT authentication; front-end on Vercel, API and database on Render.

**Crazee Burger** · React, Vite, styled-components, Firebase 2024
Online ordering app with a real-time synced admin mode, custom hooks and a design system; every merge approved in code review by a lead developer.

**O'Dog Next Door** · React, Redux Toolkit, Leaflet, Express, PostgreSQL, Redis 2023
Pet-sitting app between neighbours built by a team of 5 using Scrum: geolocated search, bookings, messaging.

### EDUCATION

**Claude Code for Business (in progress)** 2026
ViDev · Agentic development: sub-agents, skills, hooks, MCP.

**Google Ads Training** Jan 2026
Digibusiness · Search, Shopping, Performance Max, conversion tracking.

**Intensive React Training** 2024
ViDev · Advanced hooks, design system, clean code.

**French State Certification: Web and Mobile Application Developer** Apr – Oct 2023
O'clock · React, Node.js, PostgreSQL, Scrum teamwork.
